

26. The Great Crystal Cave In Mexico

Beloved Malachi, Katherine Bell, Ph.D.,D.,D.

And Barbara “Marrianna” Zimmermann

Is the Giant Crystal Cave in Mexico’s Nica Mountains that is approximately 400,000 years old part of the Iron Core Crystal Grid? Will they find Ancient Life Forms in the Samples they took from the Crystals?

“Yes, indeed and they most Certainly will Find Life Forms There.”

That was so Exciting how Wonderful to be able to see that! Is it only part of the Crystal Grid?

“Yes, it is Only Part of it.”

So it is ok for me to use a Picture of that as my Visual?

“Indeed, indeed. Remind yourself when one in the Human Realm has a Vision they can Utilize they can Continually Connect Themselves To The Vibration.”

Oh, that Really Does Help! Then I will do that for sure.

Note: I saw the Giant Crystal Cave on the National Geographic TV show and it is in November 2008 of the National Geographic Book.

Thank you Malachi.
